

Moncrieff Asset Recovery

Are you ready to hit delete on your old computer equipment?

Find your recycle button and go green with Moncrieff's asset recovery service.

A simple, piece of mind solution to safely and responsibly dispose of your old computer equipment whilst doing your bit for the environment.

And you don't even have to leave the office!

What is asset recovery?

Asset recovery is the proper disposal of obsolete and excess computer equipment in an environmentally friendly way. Asset recovery of old machines ensures your business complies with environmental laws and also mitigates risks for your business. When old machines are sitting in a storage area, there is a risk of someone getting hold of them and exposing sensitive information - intentionally or unintentionally - stored on that machine. As part of the asset recovery service, Moncrieff ensures your disks are properly cleansed to avoid exposure of private data and helps you adhere to privacy laws.

As the environment and e-waste are hot topics these days, your company cannot afford not getting involved in asset recovery. Computers harbour a number of toxic chemicals that can be hazardous if dumped in landfill. PC monitors can carry Cathode Ray Tubes (CRT) that contains around 20% lead. The Resource Conservation and Recovery Act (RCRA) prohibit the disposal of equipment that contains certain hazardous metals. Eight of these metals are found in all PCs and monitors. Do your bit for the environment by getting involved in asset recovery and be seen as a responsible corporate citizen.

How does it work?

In these times of ever-changing development of advanced technology, every business is certain to replace their computer equipment every two to four years. But what to do with the old equipment? Storage costs money, improper disposal could result in fines and selling old equipment to your staff burdens your own IT department with support calls, plus if the disks aren't cleansed properly this imposes a huge risk on your business.

Moncrieff provides the solution. A competitive low cost, australia-wide pickup service that disposes of all your obsolete equipment in an environmentally friendly way, adhering to government regulations. We also guarantee to cleanse your disks before disposing or recycling any machines. A report is provided with details on the processed equipment and we give you a certificate of the cleansing of data being performed. We do this onsite or offsite, depending on your security needs. we even give you credit for machines we can re-use!

We pick up as little as five machines as well as truck loads for major refresh products. All you need to do is contact us for an obligation-free quote.

Why get involved?

- Old equipment takes up space and storage costs money
- Moncrieff disposes of the equipment in an environmentally friendly way
- Recycling and re-using of parts that are of value
- Pick-up service with a minimum charge to get rid of equipment
- We will arrange cleansing of your data – saving you anywhere between \$50 and \$120 per disk (source: Aberdeen Group)
- Solid guarantee of every disk wiped before it gets recycled – providing you with peace of mind
- Flexible service. Anything from five units can be arranged to be disposed of.
- Moncrieff provides a full-cycle products solution. While delivering new products, we will recover old ones.
- In some cases, the costs of recovery are offset against the value of your old equipment; the service becomes free! Some machines are more valuable and can even provide you with a credit

Why Moncrieff?

Moncrieff has partnered with an e-waste collection company to provide its customers with a full-cycle service, from delivery and deployment of new hardware to pickup of end of life equipment. We aim to provide a service with reliability and integrity in an environmentally responsible way and encourage our customers to take advantage of this service.

How can I get involved?

If you have a minimum of five desktops you need to dispose of, contact us on 08 9473 3888 or info@moncrieff.com.au and we will provide you with an obligation-free quote.
